

Beaver Island Transportation Authority
RFP #2026-2A Reissue
Questions #1
6/19/2026

Attachment A-M/V Emerald Isle Work Package Specifications Reissue

Project 4: Fuel Tank Cleaning

Is there any intent to pump off and store any remaining fuel for reuse?

There is no intent to reuse or store fuel.

Project 6: Keel Cooler Inspection/Grid Cleaning

Are there any known issues with the keel coolers? Suspected leaks?

Recently there has been a small amount of coolant loss from the starboard engine. The source has not been located. If the issue is not resolved by the time of the five-year inspections, evaluation and repair costs will be quoted after arrival at the shipyard.

Model numbers provided are not complete for Walter coolers and will need more info to quote replacement seals/gaskets. Do you have any other documentation with the model numbers that can be sent to them for reference?

See RFP #2026 – 2A Reissue Addendum # 1

Should pricing include bench testing of the coolers in the shop once removed from the vessel?

Yes
